DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, 24, 25 and 50-58, drawn to compounds and compositions, classified in class 552, subclass 500+.
 - II. Claims 20 and 21, drawn to a process of making, classified in class 552, subclass 500+.
 - III. Claims 22 and 23, drawn to a process of making, classified in class 552, subclass 500+.
 - IV. Claims 26-32, drawn to a method of treating a microbial infection, classified in class 514, subclass 169+.
 - V. Claims 33-37 and 49, drawn to a method of enhancing cell permeability, classified in class 514, subclass 169+.
 - VI. Claims 38 and 39, drawn to a method of identifying compounds effective against microbe, classified in class 435, subclass 4+.
 - VII. Claim 40, drawn to a method of microbial growth control, classified in class 514, subclass 169+.
 - VIII. Claim 41, drawn to a composition, classified in class 552, subclass 500+.
 - IX. Claims 42-48, drawn to compounds and compositions, **not** classified in class 552, subclass 500+.

Art Unit: 1616

- X. Claim 49, drawn to a method of enhancing cell permeability utilizing compounds of Group IX, **not** classified in class 514, subclass 169+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I(IX) and IV, V and VII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product (see Inventions IV, V and VII).
3. Inventions II-III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process (see Inventions II and III).
4. Inventions VI, VIII and IX are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

Art Unit: 1616

808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different functions.

5. Inventions I and IX are drawn to compounds of different scopes.

6. Inventions II and III are drawn to different processes of making the claimed compounds.

7. Inventions IV, V and VII are drawn to different processes of using the claimed compounds.

8. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the others, restriction for examination purposes as indicated is proper.

9. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, from under the elected Group, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1616

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
